LiveStudies

enjoy one world

LiveStudies solutions offer face-to-face, synchronous and collaborative communication among remote contributors, from different locations, working as if they were in the same room, using touch screens, interactive whiteboards, tablets or smart phones combined with multimedia systems.
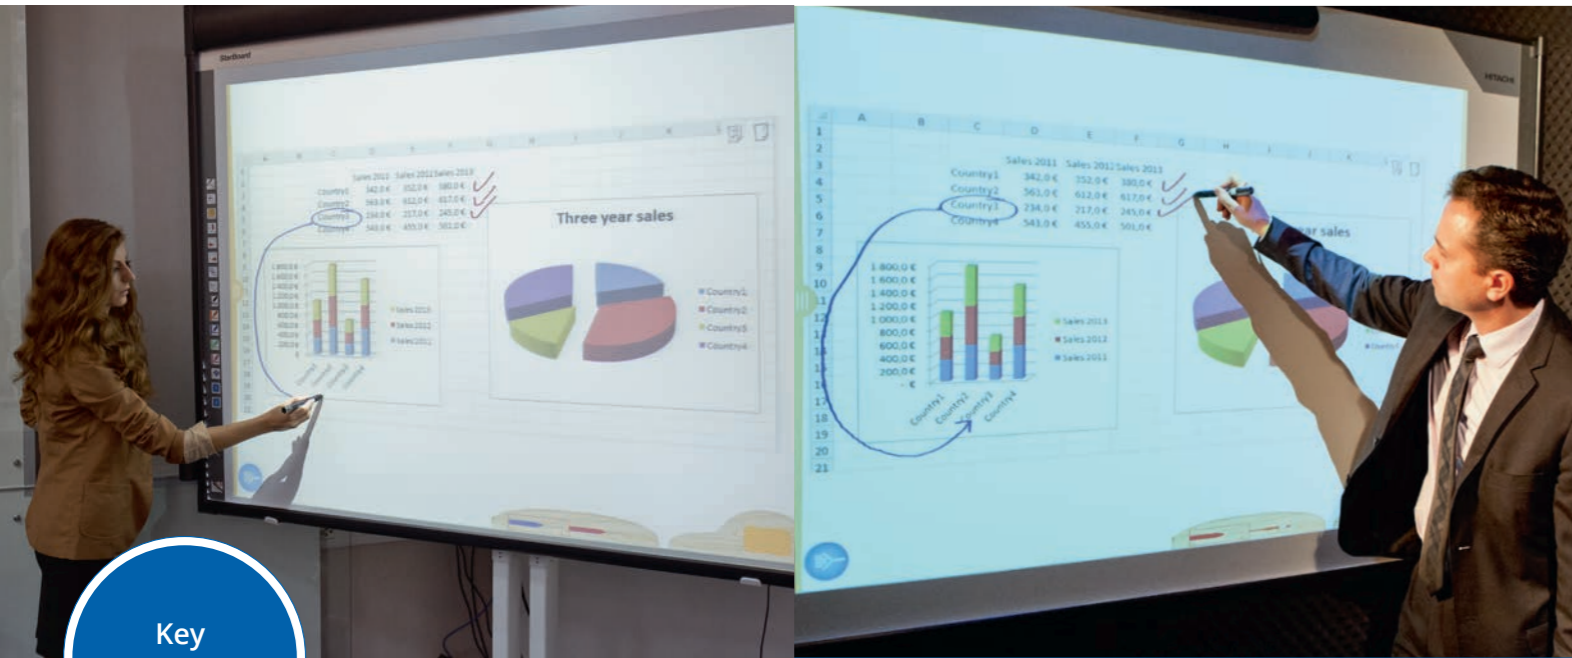

LIVE

Online Synchronous Collaboration

Collaborate interactively, live and online
Share ideas on interactive whiteboards, tablets or any other touch devices
Read, write, draw, exchange ideas, and more while seeing and talking to each other

○ ○ ○ ○ ○

Key Benefits

- Collaborate online simultaneously
- Work together on the same virtual device using a natural interface
- Reduce costs, save time and experience the human interaction as in face to face meetings
- Access your saved collaboration sessions anytime, anywhere

Delivery Model

LiveStudies can be used either on the users premises or in the cloud. In both cases you need a hardware environment based on touch sensitive devices and multimedia endpoints that can be placed in the same location or in different locations.

The LiveStudies software is developed on a client-server technology.

Designed for

Universities and other educational institutions
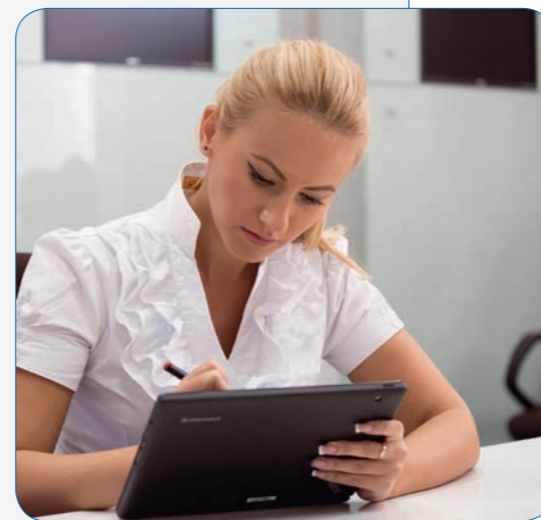

Training companies

Tutoring companies or individual tutors

Multi-office companies and governmental institutions

Conference service providers

Individuals

FLIPBOARD

- Save and play your sessions
- Access the repository
- Browse Internet
- Launch external apps
- Set whiteboard

CLIP BOARD

- Keep reference content
- Access from any page at any moment
- Drag and drop to/from the work board
- Use the same as the work board

WORK BOARD

- Collaborate
- Write
- Draw
- Handle objects
- Handle and comment multimedia

COMMAND DECK

- Write and erase tool boxes
- Multipage tools
- Write and shape recognition

Key Features

| Key Features |
|---|
| Interactive live online collaboration |
| Share ideas on the interactive whiteboards, tablets or any other touch devices |
| Read, write, draw, exchange ideas, and more while seeing each other and talking to each other |
| Work together simultaneously on the same virtual device |
| Define and access multi-page virtual devices and dynamically assign areas on each physical device to any page of any virtual device |
| Integrate touch sensitive devices through a natural interface |
| Use all the tools to write on the touch sensitive surfaces as on the conventional writing surfaces (blackboard, flipchart, notebook) |
| Use fully and naturally customizable writing and editing tools |
| Load, position, resize and annotate pictures, animations and movies |
| Use text recognition tools to easily find out more information on the Internet |
| Access your document repository for additional materials and presentation objects |
| Access Internet and drag objects |
| Keep your activity history and repository with save, replay and edit functions for future review or sharing |
| Organize groups that interact simultaneously on different virtual devices during a session |
| Assign a moderator who manages the groups and the access rights of each group |

LiveStudies

enjoy one world

Create one world bringing together the real and virtual dimensions in a natural and intuitive environment. LiveStudies allows you to collaborate and communicate easily and naturally with your clients, business partners, students or co-workers.
